NAVAL AIR STATION LEMOORE ENVIRONMENTAL POLICY

To provide the highest level of mission support and quality of life services for all activities at Naval Air Station Lemoore and the surrounding area. Our goal is to actively promote mission readiness through environmental stewardship. Our current top four environmental concerns are:

- Identifying and mitigating bird-aircraft strike hazards through prudent and effective environmental controls.
- Building and retaining sustainable utilities in support of the base community. Ensuring the responsible use of energy and water, including conservation and improved efficiency. To provide dependable, affordable energy and energy services.
- Controlling hazardous material use, responding to hazardous substance spills and illegal dumping of solid waste.
- Preserving significant aspects of the natural and cultural environment and maintaining sustainable land management.

In conducting our mission operations, we are committed to:

- Protecting the environment.
- Preventing pollution by utilizing cost-effective environmental technology and procedures, and by minimizing the generation of wastes and releases of pollutants.
- Continual and measurable improvement, leadership, and stewardship in protecting the environment, promoting safe work conditions and pursuing sustainable mission practices.
- Comply with applicable environmental federal, state, and local regulations, Department of Defense and Navy policies, and additional environmental mandates.

DOUGLAS M. PETERSON
