

# Final Environmental Assessment and Finding of No Significant Impact for Renewed Fueling Operations at Defense Fuel Support Point San Pedro (In Support of a Commercial Lease of the Marine Terminal Only, with No Navy Fueling Requirement)

The U.S. Navy has prepared a Final Environmental Assessment (EA) to analyze the potential impacts of its initial proposal to renew fueling operations at Defense Fuel Support Point San Pedro. The Navy has selected a subset of Alternative 1 for implementation and has documented this selection in the Finding of No Significant Impact (FONSI).

At this time the Navy is proposing to enter into a lease for commercial use of the Marine Terminal only, with no Navy fueling requirement, as described in the FONSI. Any proposed construction, demolition, and operations by a lessee to occur at the Marine Terminal would need to be reviewed and approved by the Navy. The Navy has determined that fueling for Navy ships is not currently a priority; thus, the requirement to allow for fueling of Navy ships under such a lease has been canceled.

While the Final EA on which the FONSI is based analyzes the anticipated environmental impacts associated with the proposed outlease and reutilization of both the Marine Terminal and Main Terminal, cancellation of the Navy fueling requirement at Defense Fuel Support Point San Pedro could allow for a wider range of uses to occur at the Main Terminal under a potential lease, which would require further environmental analysis. Any required additional environmental impacts analysis for a separate lease at the Main Terminal site will be addressed in a Supplemental EA, to be released at a later date.

The Final EA and FONSI are available online at: [www.cnic.navy.mil/SanPedroEA](http://www.cnic.navy.mil/SanPedroEA), and at several libraries: San Pedro Regional, Peninsula Center, Bay Shore Branch, Miraleste Branch, and Wilmington Branch.

## Environmental Review Process

The Navy held a 35-day public scoping period from October 10, 2018, through November 13, 2018, to solicit public input on the scope of analysis and environmental resource areas to be considered in the EA. The Navy held a 46-day public comment period from April 19, 2019, through June 3, 2019, upon release of the Draft EA for public review and comment. On May 6, 2019, the Navy hosted an open house information session to inform the public about the Proposed Action and receive public comments. Public and agency comments were considered in the development of the Final EA.
