

ENVIRONMENTAL ASSESSMENT FOR NAVAL WEAPONS STATION SEAL BEACH PACIFIC COAST HIGHWAY AREA REUTILIZATION

Public Scoping Fact Sheet

Introduction

Naval Weapons Station Seal Beach (NWSSB) is the primary munitions installation for the Navy's Pacific Fleet surface ships. Its primary role is to store Navy and Marine Corps munitions, such as missiles, torpedoes, and gun ammunition, and to load and unload Navy ships and larger Coast Guard vessels with the munitions they need to conduct their missions.

The purpose of the Proposed Action is to optimize the use of the Pacific Coast Highway site by promoting mission sustainment and quality of life improvements for NWSSB personnel, their dependents, and the local community.

The need for the Proposed Action is to ensure the fullest possible use of non-excess, underutilized federal property. At present, the Navy anticipates including analysis of a potential lease using the leasing authority provided under 10 United States Code (U.S.C.) Section 2667 to help sustain the Navy mission at NWSSB and provide quality of life initiatives benefiting the military, dependents, and NWSSB civilians.

The U.S. Navy is beginning the preparation of an Environmental Assessment pursuant to the National Environmental Policy Act (NEPA) to analyze the potential impacts of reutilizing an area of non-excess, underutilized property at Naval Weapons Station Seal Beach.

The Navy is requesting public input at the earliest stage to ensure that community concerns are considered and appropriately addressed. This fact sheet describes the proposed project and how the public can be involved in the environmental review process.

About the Project

Exploring alternatives to reutilize Navy property on the northeast corner of the Pacific Coast Highway and Seal Beach Boulevard intersection consisting of two sites:

- Site 1 (9.27 acres), and
- Site 2 (19.61 acres).

Environmental Assessment

During development of the Environmental Assessment, the Navy will evaluate a Proposed Action and several alternatives for potentially accomplishing it. The public can participate in the process by helping to identify issues and potential alternatives.

The Environmental Assessment will focus on resource areas that may potentially be impacted. The public is encouraged to provide input on these and other resource areas: Land use and coastal zone management; traffic and circulation; visual resources; biological resources; utilities; noise; cultural resources; topography, geology, and soils; air quality; water resources; and environmental justice/socioeconomics.

The NEPA Process & Community Involvement

The National Environmental Policy Act (NEPA) requires federal agencies to consider the potential environmental impacts of their actions before making a decision. The public has an opportunity to provide input at key phases of the NEPA process:

- **During the public scoping phase**

The public helps to identify environmental issues and potential alternatives to be analyzed in the Environmental Assessment.

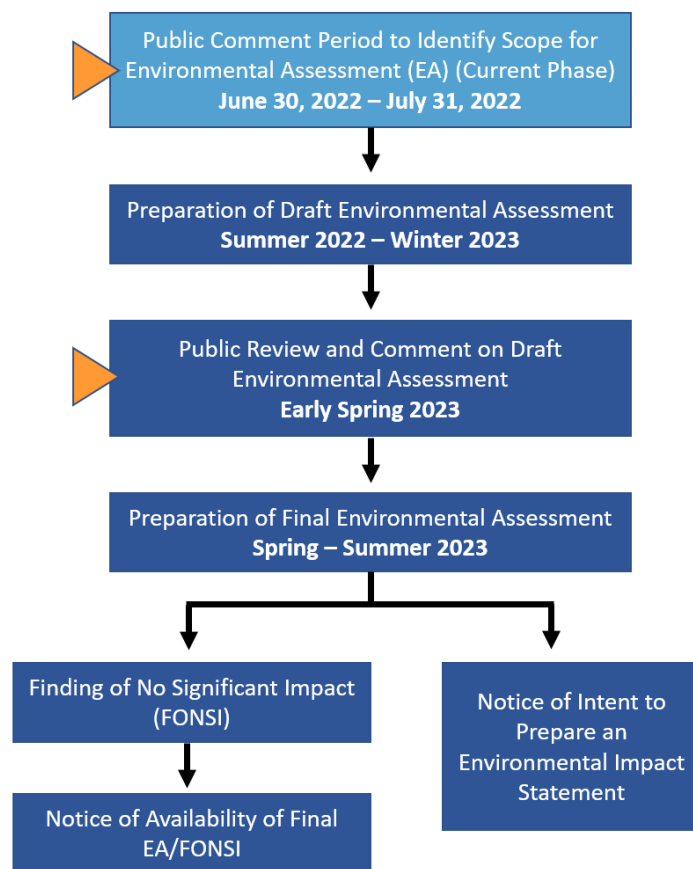

- **When the Draft Environmental Assessment is completed**

The public evaluates and comments on the analysis of the Proposed Action and Alternatives.

The Navy is committed to a transparent and thorough environmental review. The public's input helps to ensure all relevant issues are appropriately addressed.

The Navy will use the findings of the Environmental Assessment to determine the next steps in the NEPA process. If it is found that significant impacts would result, which could not be mitigated to less than significant levels, then the preparation of an Environmental Impact Statement would be needed. If the findings indicate that environmental impacts would not be significant, the Navy would prepare a Finding of No Significant Impact, which would describe how the Navy determined the Proposed Action would have no significant impacts. The Navy could then proceed with the selected alternative.

National Environmental Policy Act (NEPA) Process

Boxes with ► indicate opportunities for public involvement.

This schedule is tentative and may be impacted as a result of public input and funding constraints.

How to Submit Comments

Submit written comments online:

<https://www.cnrc.navy.mil/pch>

Mail written comments to:

Naval Facilities Engineering Systems Command Southwest
Attn: Amanda Peyton
750 Pacific Highway (12th Floor, Environmental)
San Diego, CA 92132-5190 or e-mail: AMANDA.T.PEYTON.CIV@US.NAVY.MIL

For more information

Contact the Naval Weapons Station Seal Beach Public Affairs Office at 562-626-7215.

Comments for the scoping phase must be submitted by the close of the public comment period on July 31, 2022. All timely and substantive comments will be considered in preparation of the Draft Environmental Assessment.

There will be another public comment opportunity when the Draft Environmental Assessment is available for public review and comment, which is expected to be in Spring 2023.
